

# DID YOU KNOW?

There are safe and effective treatments and prophylactics that can help obliterate COVID-19 without risky vaccines or disastrous lockdowns.

MILLIONS  
AGAINST  
MEDICAL  
MANDATES

- **Did you know** (National Institutes of Health) COVID-19 treatment guidelines as of 12/29/20, shockingly continue to ignore the pleas of frontline physicians using safe and effective treatments based on high-quality research? But here's some good news (at 45:12 to 49:21).

<https://bit.ly/3pSauSe>

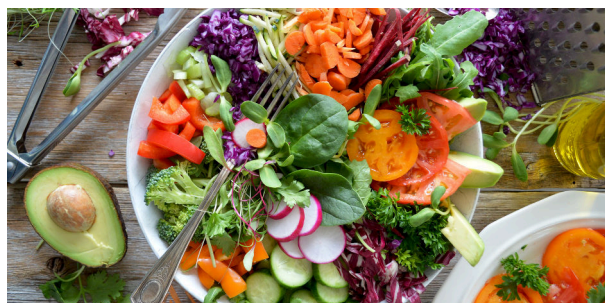

- **Did you know** *Ivermectin*, a drug approved by the FDA to treat other conditions, has been shown to successfully prevent and treat COVID-19?

- At a US Senate hearing on early treatment and prevention of COVID-19, lung specialist Dr. Pierre Kory, of the Frontline COVID-19 Critical Care Alliance, described the miraculous benefit of Ivermectin and testified, "If you take it you will not get sick!" [The typical preventive dose is 12 mg. once per week]. <https://bit.ly/3pSNx1h>
- In a study by lead Argentinian investigator, Dr. Héctor Carvallo, not a single one of 788 healthcare workers given Ivermectin preventively got sick with COVID-19, while a whopping 58.2% of approximately 407 healthcare workers NOT taking Ivermectin (using only PPE) tested positive and got sick. <https://bit.ly/3pLdJer>
- Worldwide, over 3.7 billion people have been successfully treated with Ivermectin for a wide variety of conditions other than COVID-19, and now 4 randomized controlled trials and 3 observational trials around the world show how safe and effective ivermectin is in preventing and treating COVID-19 (both in outpatient and hospital settings). <https://bit.ly/2MpWSPM> (details and dosing from 27:14 to 39:24); <https://bit.ly/35c7iJp>

- **Did you know** the long-used medication, *hydroxychloroquine (HCQ)*, is also effective in COVID-19 prevention and treatment of early and moderate stage disease, and it's very safe when used in the correct low dosage regimen? (Government reports of HCQ dangers followed studies using abnormally high and potentially lethal dosages). You can get a same-day prescription via telemedicine. <http://bit.ly/2JKAy2z>

- **Did you know** *Vitamin D* reduces your risk of getting COVID-19, and, if you get COVID-19, reduces your risk of dying? Did You Know that the same is true for *Melatonin*, *Vitamin C*, and *Quercetin*, and also for *Zinc*? <https://bit.ly/2MpWSPM> (at 10:30-16:17)

- **Did you know** you can access preventive and lifesaving COVID-19 drugs now? <http://bit.ly/357JsOW>

- **Did you know** you can bring evidence to your physician or hospital of COVID-19 preventive and life-saving protocols that are better than the NIH recommendations? Tell him/her to go to <http://bit.ly/3n96zik> and explore the protocols and to read the Ivermectin FAQs at <http://bit.ly/2MCcMHb>

- **Did you know** the Association of American Physicians and Surgeons has published "A Guide to Home-Based COVID Treatment"? You can request the guide at <http://bit.ly/38VwgOk>
